

Typical Applications:

- Labeling Machines
- Molds and Dies
- Packaging Equipment
- Heat Sealing Equipment
- Refrigeration
- Food Processing

These heaters are designed with high or low density, and manufactured in a variety of stainless steel sheaths, from 1/4" to 2" in diameter.

Available with bushings of various sizes, designed for immersion applications. Various lengths, wattage and voltage specifications are available.

EPIC Specification

Recommendations:

1. Always use the largest possible heating cartridge to reduce wattage and increase element service life.
2. Use the closest practical fit
3. Protect leads from moisture and physical damage.
4. Avoid excessive lead wire length.
5. Locate your temperature sensing within 1/2" (1.27 cm) from element.

How to Order:

1. Select sheath length and diameter dimensions.
2. Select watt and voltage specification.
3. Select the suitable terminal type.
4. Contact EPIC for more information.
