Note: Clasp size & type will vary with manufacturer.

**We will customize to your diameter!**

### Silicone Rubber Drum Heaters

Low watt density electrical resistance in a blanket form.

### Silicone Rubber Elements

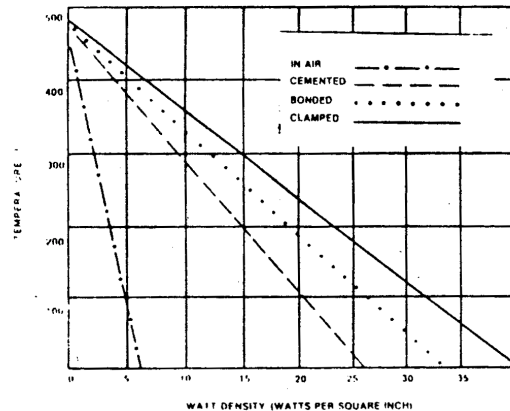

Designed to provide an efficient means of freeze protection.

### Features

- Effective viscosity control.
- Controlled melting of solids and maintaining materials in process.

### Application Advantages

- C.S.A. Component recognition.
- Continuous operation from 90 to 500 degrees Fahrenheit.
- Moisture and chemical resistant
- Thermostat or other temperature controller
- Easily removed spring fasteners (see fig. 1)

### How to Order:

- 1) Specify diameter, and dimensions. \*steel or metal drums only!!
- 2) Specify wattage (up to 1200 watts for 55 gallon drum)
- 3) Power Supply: 120 or 240V.
- 4) Thermostat (Optional)
